CHOICE ROCKPLANTS
RARE ALPINES

SPRING
1929

RAINBOW NURSERY CO., INC.
111
EAST NORTHPORT
LONG ISLAND, NEW YORK

TERMS OF BUSINESS and GENERAL SUGGESTIONS.

Correspondence: Every inquiry is given careful attention. We ask to write every inquiry brief and clear.

Orders: Use the order sheets accompanying this catalogue. It greatly facilitates shipment if orders are given early.

Prices: In this catalogue are f.o.b. our Nurseries at East Northport, N. Y. Packing is charged at cost.

Terms: Cash or satisfactory references must accompany all orders, unless the party ordering has established an open account with us.

Our Responsibility: While we pay our particular attention and exercise greatest care to have our plants genuine and true to name or description, we do not give any warranty, expressed or implied, or guarantee them to live and grow or give specific results. In case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not be held responsible for a greater amount than the original price of the goods.

Complaints: All errors and omissions in the execution of the orders will be properly adjusted, if we are notified immediately upon receipt of the goods.

Transportation Rules: All plants ordered are fresh-dug and travel at the purchaser's risk. We do not guarantee safe delivery. Our responsibility ceases when we make delivery to the transportation company or on the purchaser's grounds. Therefore, any claims should be made promptly to the agent at the point of delivery. We ship all plants by express. If shipping by parcel post is required, this must be especially and plainly stated. For parcel post going to all localities west of the Mississippi add 20% to the amount of the order, or 10% for parcels going to all localities east of the Mississippi.

Special and Fast Deliveries to Points on Long Island, etc. To all points on Long Island, in New York City, Brooklyn, Bronx, Westchester, Coast of Connecticut (opposite Long Island Sound), we are making Special deliveries with our fast trucks at cost, thus saving our customers extra cost of packing (freight and cartage is eliminated). The plants are delivered in a much better condition than if packed in cases and of paramount importance, the plants are landed on the grounds within a short time after being dug.

SOMETHING ABOUT ROCK GARDENS AND ROCK PLANTS

Every Garden, no matter how large or small, offers a possibility of a Rock Garden. Whether the site is naturally suitable or "Made to Order," a Rock-Garden is the pet show place of the home grounds and an unforgettable spot most interesting and picturesque. The wide range of color and beautiful forms of the various plants and species offer a real and new picture to study each day of the Year.

It has been and still is our aim, not only to grow and sell the best of the already well known varieties of rockplants but to provide American Gardens with the Uncommon, RARE and New Varieties, sparingly seen and many of them, not yet known in this country.

Our search for the unusual has led us to the furthermost corners of the earth, thus enabling us to gather here in our RAINBOW NURSERIES the most beautiful Gems, these delightful floral children of the mountains.

All these flowers vie with one another for Brilliance of Color and Sheer Beauty.

By Fall, 1929 we will have about 1000 different varieties under cultivation. By then, we believe to maintain the largest collection of Rockplants in the United States.

All our plants are properly labeled and named.

Our SERVICE DEPARTMENT is supervised by experienced men, who are experts on rockplants and in rockgarden construction.

If there is anything we can do to aid people with their problems, such as rearranging their present rockgarden, suggesting further additions, about the correct plants to use, in brief, any or every information desired, concerning Rockplants or Rockgardens, we gladly will give it without any obligation whatsoever.

RAINBOW NURSERY CO., INC.

East Northport, N. Y.

GENERAL PRICE LIST OF PERENNIALS FOR THE ROCKGARDEN

We have about 800 different varieties of Rockplants under cultivation. All listed varieties without description are ready during the last part of May 1929. Of some varieties we have only a limited stock this Spring.

All varieties marked P.G. are Pot Grown, this enables us to make shipments during the Summer months.

The numbers behind the Genus indicate how many varieties we are growing, besides these listed, and which are ready later.

Plants marked * must be protected during the Winter.

One to Four plants of each variety are sold at the Each rate.

Five to Twenty-four plants of each variety are sold at the Ten rate.

Twenty-four to 250 plants of each variety are sold at the Hundred rate.

	A	3	10	100
ACAENA, (3) Rosaceae (New Zealand Bur)				
Rapid growing carpeters; sun; ordinary soil.				
*51 Glauca , fine glaucous foliage. 1 inch. P.G.	\$1.20	\$3.00	\$25.00	
ACHILLEA, (5) Compositae (Milfoil)				
Dry, sunny places; ordinary sandy soil.				
60 Ageratifolia . A fine species with silvery foliage and white flower heads. 6 ins. June—July.	1.20	3.00	25.00	
61 Clavennae , Finely cut foliage. White flower heads. 6 ins. June. P.G.	1.20	3.00	25.00	
67 Tomentosa . The common Milfoil with a profusion of golden yellow Flowers. 10 ins. Summer.	.90	2.40	18.00	
ADONIS, (2) Ranunculaceae				
These fine plants should be in every garden.				
A sunny place. Well-drained, good soil.				
*77 Vernalis . A fine type with rich golden cup-shaped flowers. 9 ins. March. P.G.	1.50	3.50	00.00	
AETHIONEMA, (1) Cruciferae. (Persian Candytuft)				
Shrublike beautiful plants with fine glaucous foliage. A warm, sunny place. Gritty, loamy soil.				
81 Grandiflora . Slender spikes of rosy pink flowers. 9 ins. June—July.	1.20	3.00	25.00	
82 Persicum . Somewhat deeper in color than Grdfl. 6 ins. June—July.	1.20	3.00	25.00	
AJUGA, (2) Labiateae (Bugle)				
Useful plants for shady places or for ground cover under trees. Any soil.				
86 Genevensis . Dense spikes of blue flowers. 8 ins. May—June.	.90	2.40	18.00	
87 Reptans, rubra . Deep purplish flowers. 4 ins. May—June.	.90	2.40	18.00	

ALLIUM, (6) Liliaceae	3	10	100	
ALSINE, (1) Caryophyllaceae				
Useful carpeters and for walk planting. A sunny place and sandy soil.				
101 Pinnifolia. Forming tufty mats with tiny white flowers. $\frac{1}{2}$ inch. June.	\$.90	\$ 2.40	\$ 15.00	
102 Verna. Handsome cushions, covered with white starry flowers. 2 ins. May—June.	.90	2.40	15.00	
ALYSSUM, (5) Cruciferae (Rock Madwort)				
The Alyssums are well known. The plants like well-drained ordinary soil. Good for dry wall planting.				
105 Moellendorfianum. A new species with round silvery leaves, and a profusion of yellow flowers. A very compact grower. Very choice. 8 ins. May.	P.G.	1.50	3.75	30.00
107 Rochilli. New and choice. Very dwarf with silvery-gray foliage, and fine yellow flowers. 4 ins. May.	P.G.	1.80	4.00	5.00
108 Rostratum. The best of the old Alyssums. Yellow flowers. 6 ins. June.		.90	2.40	18.00
109 Saxatile, (Tom Thumb), An improvement of the old Saxatile. Only 3-4 ins. Fine silvery-gray foliage producing showers of pale yellow flowers. May.	P.G.	1.50	3.00	00.00
110 Serpyllifolium. The best of the old dwarf Alyssums. Small silvery foliage covered with pale yellow flowers. May—June.		.90	2.40	18.00
ANACYCLUS, (1) Compositae				
ANDROSACE, (14) Primulaceae (Rock Jasmine)				
ANEMONE, (12) Ranunculaceae (Wind Flower)				
Anemones like half shady positions and rich, well drained soil.				
*154 Hupehensis. This interesting species from Central China produces distinct Mauve-Rose flowers with golden yellow centers. 12 ins. Sept.—Frost.	P.G.	.90	2.40	18.00
*155 Hupehensis. Fl. Pl. The double flowering form of above.	P.G.	1.05	2.80	24.00
156 Nemorosa. The wild Anemone of the woods. 6 ins. April.		.90	2.40	18.00
159 Pulsatilla. The well known “Pasque Flower” with its handsome large silky purple flowers is a real treasure for every rockgarden. Like a sunny place and lime. 6-8 ins. Apr.—May.		.90	2.40	18.00
160 Pulsatilla, rubra. With reddish-purple flowers. 6-8 ins. April—May.		1.10	2.80	24.00

ANTENNARIA, (3) Compositae		3	10	100
ANTHEMIS, (2) Compositae	(Camomile)			
For a sunny location. Any soil.				
176 Styriaca. A rare species with distinct white downy foliage. Large white flowers. 6 ins. June.	P.G.	1.50	3.50	00.00
ANTHYLLIS, (2) Leguminosae				
ANTIRRHINUM, (2) Scrophulariaceae				
AQUILEGIA, (5) Ranunculaceae	(Columbine)			
For sunny locations and well drained soil.				
190 Flabellata, Nana. This scarce species has fine white flowers. 8 ins. May—July.	P.G.	1.20	3.00	00.00
191 Reuteri. A beautiful form of Alpina with bluish flowers. 10 ins. May—June.	P.G.	1.20	3.00	00.00
ARABIS, (5) Cruciferae	(Rockcress)			
No Rockgarden is complete without some of these useful plants. All like sunny places and ordinary soil. Very good for dry wall planting.				
195 Albida. The well known white flowering rock- cress. 10 ins. April—May.		.75	2.00	15.00
196 Albida, Fl. Pl. The double flowering. 10 ins. May.		1.05	2.50	20.00
199 Alpina, rosea, splendens. New and Choice. Very compact growers, producing masses of clear pink flowers on erect stems. 6-8 ins. May.	P.G.	1.20	3.00	00.00
201 Kellereri. A dainty. The dwarfest of the Rock- cresses forming neat rosettes. 3 ins. White.		1.20	3.00	00.00
203 Racemosa. Another tiny gem. Slow growing. Rare.		1.50	4.00	00.00
ARENARIA, (4) Caryophyllaceae	(Sandwort)			
Good carpeters and path plants for sunny places and ordinary, sandy soil.				
210 Balearica. An excellent creeper of mosslike habit. Good for covering bulb plantings. Part shade. 1 inch.	P.G.	.90	2.40	15.00
211 Grandiflora. A good trailer for sandy banks, with masses of white flowers on wiry stems. 6 ins. May—June.		.90	2.40	18.00
213 Montana. The finest of the Genus. Dark green foliage. Large pure white flowers. 6-8 ins. May.		1.05	2.80	20.00
216 Vernalis, (caespitosa). See No. 102 Alsine verna.				
ARMERIA, (3) Plumbaginaceae	(Thrift, Seapink)			
Armerias are very useful for edging borders. The plants form rosettes of evergreen narrow				

	leaves. They like sun and ordinary, sandy soil.	3	10	100	
220	Caespitosa. A new and fine introduction. The finest of the Genus. It forms small handsome rosettes. Covered with pink flowers all summer. 1 inch.	P.G.	1.50	2.80	24.00
222	Laucheana (Vulgaris). The best edging plant. The grasslike leaves form globular rosettes, covered with light rose flowers during spring and summer. 6 ins.		.90	2.00	15.00
ARRHENATERUM, (1) Gramineae (Oat Grass)					
ARTEMISIA, (4) Compositae (Wormwood)					
	Dwarf shrublike, scented plants. For hot, dry, sandy banks.				
235	Argentea. Very choice. Wooly silvery-gray foliage. 12 ins.	P.G.	.90	2.40	18.00
236	Baumgartenii. A rare species with elegant silvery foliage. Very dwarf. 2-3 ins.		1.50	3.00	00.00
ASRAUM, (1) Aristolochiaceae					
ASPERULA, (4) Rubiaceae (Woodruff)					
	For part shade. Well drained good soil.				
254	Odorata. Fast spreaders, sweet scented. Masses of white flowers. 6 ins. Summer.		.90	2.40	18.00
ASTER, (8) Compositae					
	We grow the dwarf kinds, which are suitable for Rockgardens. Good soil and sun.				
260	Alpinus. The alpine Aster with mauve flowers. 6-8 ins. May—June.				
			.90	2.00	15.00
ASTRAGULUS, (3) Leguminosae (Milk Vetch)					
AUBRIETIA, (9) Cruciferae (Wall Cress)					
	Indispensable plants for Rock work or Dry Wall Planting. Dry sunny locations and ordinary sandy soil.				
	ONLY POT GROWN PLANTS. Field grown plants do not establish readily. Aubrietias bloom during May—June.				
275	Campbelli. Large flowers. Deep blue. A new and fine introduction. 6 ins.		1.20	2.50	00.00
278	Deltoidea. A charming purple flowering variety. 6 ins.		1.05	2.00	00.00
279	Fireking. Wonderful bright crimson flowers. New. 6 ins.		1.20	2.50	00.00
281	Gracea. A free flowering bright blue kind. 6 ins.		1.05	2.30	00.00
282	Grandifl., hybr. The old large flowering. 8 ins.		.90	1.80	15.00
283	Leichtlinii. Very choice and New Deep Rose. 6 ins.		1.50	3.00	00.00

285 Mrs. Lloyd Edwards. A new excellent blue flowering variety with white centers. 6 ins.	3	10	100
	1.50	3.00	00.00
289 Violacea. Large flowering. Dark violet. 6 ins.	.90	2.00	00.00

AURICULA, (see Primula)

B

BELLIS, (4) Compositae	(English Daisy)			
These well known charming perennials like part shade and good well drained soil.				
300 Perennis. The old fashioned single English Daisy. 6 ins.		.90	1.50	12.00

BELLIUM, (2) Compositae	(Liliput Daisy)			
305 Bellidiodies. Has the habits of Bellis, but has smaller leaves and tiny white flowers with pink shade. 2 ins. Summer.	P.G.	1.05	2.50	00.00

BETONICA, Labiate	(Betony)			
Fine tall growing perennials for ornamental effects in background. Sun. Ordinary soil.				
310 Grandifl. Robusta. Strong grower with soft rose flowers. 18 ins. August.		.90	2.50	00.00
311 Grandifl. Superba. Showy spikes of intense mauve flowers with a rich shade of purple.		.90	2.50	00.00

BRUNELLA, (3) Labiate	(Self Heal)			
------------------------------	-------------	--	--	--

C

CALLUNA, (2) Ericaceae	(Heather)			
Plants closely related to Ericas. They love a sandy-peaty soil and sun. When planted in masses they have a wonderful effect.				
346 Vulgaris, Alporti. Strong growers. Shrublike evergreens, with slender spikes of rosycarmine flowers, which cover the entire plant. 10 ins. August.	P.G.	1.50	4.00	00.00

CALANDRINIA, Portulacaceae				
One of the brightest flowering of all Rock-plants. A light, sandy soil on a hot dry place suits them best.				
*350 Umbellata, A plant of rare beauty, forming neat spreading tufts, covered with glowing crimson-magenta saucer shaped flowers. 6 ins. June—November.		.90	2.40	18.00

CALLIRHOE, Malvacea	(Miniature Marshmallow)			
For sunny, sandy locations.				
355 Involucrata. Like little Hollyhocks, with crimson purple flowers. 10 ins. Summer.		.90	2.40	18.00

CALTHA, Ranunculaceae	(Marsh Marigold)	3	10	100
A waterloving plant for pools and brooks. Sun or shade.				
360 Palustris. Rich golden yellow flowers. 10 ins. April—June.		.90	2.40	18.00
CARLINA, (1) Compositae (Dwarf Alpine Thistle)				
CALAMINTHA, (1) Labiateae	(Calamint)			
Real Alpines which like a sunny place where they can creep over the rocks. A gritty soil suits them best.				
362 Alpina. A choice plant with aromatic foliage. The whole plants are covered with deep purple flowers. 6 ins. June—August.		.90	2.40	18.0
CALCEOLARIA, (1) Scrophulariaceae (Fishermans Basket)				
CAMPANULA, (23) Campanulaceae (Bellflowers)				
These floral Gems should be planted in every garden. Sun and well drained gritty soil suits them best.				
370 Alpina. A new high alpine species with hairy foliage which gives the plants a characteristic shaggy appearance. The nodding flowers are typically deep blue. 6 ins. June. P.G.	\$1.50	0.00	00.00	
373 Carpathica. This well known species forms compact tufts. For edging and for the rock- garden. Clear blue bells borne on erect, wiry stems. 6-8 ins. June—Oct.	.90	2.40	18.00	
374 Carpathica, alba. The white flowering form of the above.	.90	2.40	18.00	
375 Collina.				
377 Excisa.				
378 Garganica. A Gem. Wonderful trailers covered with violet flowers which have white centers. 3 ins. June.	1.05	2.80	20.00	
379 Glomerata, acaulis.				
382 Laurii.				
385 Pulla.				
386 Pusilla.				
387 Pusilla, alba.				
389 Rainerii.				
390 Rotundifolia. "Bells of Scotland." This old fashioned beautiful variety is doing fine be- tween rocks or on top of a wall. Clear blue flowers. 10-12 ins. June—August.	.90	2.40	18.00	
392 Tomasiana.				

CERASTIUM, (2) Caryophyllaceae
(Snow in Summer)

	These rapid growers belong to a fine plant group for dry wall planting or edging borders. Ordinary sandy soil in hot dry place.	3	10	100
401	Biebersteinii. This improvement of Tomentosum is a very compact grower and has larger and pure white flowers. 6 ins. Summer.	1.05	2.50	20.00
402	Tomentosum. The old fashioned variety.	.90	2.00	15.00
CHEIRANTHUS, (5) Cruciferae (Wall Flower)				
	Especially for the planting on old walls or for a high spot in the Rockgarden. For a hot sunny location on ordinary soil.			
410	Allioni. This variety blooms itself to death. Masses of dazzling fiery orange colored flowers, lasts from early spring until late summer. For color harmony plant Cheiranthus together with Cerastium, Arabis and Aubrieta. 12 ins.	.90	1.50	12.00
411	Alpinus.			
412	Linifolius. New lavender flowering species.	1.05	2.50	20.00
CHRYSANTHEMUM, (2) Compositae (Wild Chrysanthemum)				
CODONOPSIS, Campanulaceae				
	For a light ordinary soil and a sunny place.			
430	Ovata. Large hanging bells of lavender blue, beautiful marked orange on the inside. 10 ins. June.	1.20	3.00	25.00
CORON LLA, (1) Leguminosae				
COLCHICUM, (8) Liliaceae (Meadow Saffron)				
CORYDALIS, (2) Fumariaceae (Fumitory)				
	For a moist spot in the open sun or in part shade. Good well drained soil.			
*451	Cheilanthalifolia. Beautiful low growing plants with fernlike feathery foliage. Producing long spikes of pale yellow flowers. 10 ins. May—June.	1.50	4.00	35.00
COTULA, (2) Compositae				
COTYLEDON, (1) Crassulaceae				
CREPIS, Compositae				
475	Aurea. A dainty plant for Rockgarden or Border. With beautiful yellow flowers. Rich sandy soil and in a warm sunny place. 8 ins. June—July.	1.20	3.00	25.00

CRUCIANELLA, Rubiaceae	(Crosswort)	3	10	100
Of easy culture. Good plants for the Rockery in a sunny place and ordinary soil.				
480 Stylosa. Choice. A long and free flowering plant with heads of blue flowers. 6-8 ins. Summer.		1.20	3.00	25.00
CYCLAMEN, (4) Primulaceae	(Wild Species)			
CYTISUS, (6) Leguminosae	(Broom)			
Ornamental low growing shrubs. Their free flowering makes these plants most desirable. For warm sunny places and stony soil. We have some strong 1 year plants in pots.				
495 Albus. White flowers. 18 ins. Summer.		1.50	3.75	00.00
496 Andreanus. A rare beautiful plant produces masses of yellow flowers with crimson wings. 18-24 ins. Summer.		2.10	5.00	00.00
499 Purpureus. A fine species with dark green glossy foliage and purplish flowers. Very choice. 2-3 feet. Summer.		1.80	4.00	00.00
500 Nigricans. New and choice. Yellow flowers. 18 ins.		1.80	4.00	00.00
501 Praecox. An effective plant for the background, between evergreens or in the shrub border. It produces long slender branches, which are entirely covered with pale yellow flowers. Uncommon. 2-3 feet. May—June.		2.10	5.00	00.00

When not familiar with Rockplants, Rockgarden Construction, or proper Soil Mixtures, don't hesitate, ask us by writing to our Service Department.

D

DAPHNE, (3) Thymelaeaceae	(Garland Flower)			
Shrubby, trailing evergreen plants. One of the finest plants that can be grown in a rock- garden. The foliage is handsome and the flowers distribute a distinct, sweet scent. Cut plants back slightly after the first bloom, then they will flower again the same year. Well drained gravelly soil and part shade.				
*520 Cneorum. The best known of the Genus. Forms spreading tufts with pink fragrant flower heads. 12-15 ins. diameter. 75c. each.		2.00	6.00	00.00

DELPHINIUM, (8) Ranunculaceae	(Larkspur)			
We grow the dwarf and semi-dwarf varieties, which are most suitable for the Rockery or small border. As cut flowers they are wonder- ful. A border of Lilies mixed with Delphi-				

	niums make an unforgettable picture. A deep rich soil and sun or half shade suits them best.	3	10	100	
530	Belladonna. The well known variety producing spikes of sky blue flowers. 18-24 ins. July—Sept.	.90	2.00	15.00	
531	Bellamosa. Wonderful dark blue form of Belladonna.	.90	2.00	15.00	
532	Chinense. A beautiful dwarf species with feathery foliage and pretty ultramarine flowers. 12-18 ins. July—August.	1.05	2.25	18.00	
533	Chinense, album. The pure white flowering form of the above.	1.05	2.25	18.00	
534	Coeruleum				
538	Pumilum. Thom Thumb.				
DIANTHUS, (18) Caryophyllaceae		(Pinks)			
	We grow some of the best old varieties and have introduced many new and rare species.				
550	Alwoodi, alpinus. This new improvement of Alpinus has shining dark green foliage. Flowers deep rose-pink. For a dry sunny place between rocks. 3-4 ins. Summer.	1.05	2.50	20.00	
551	Arenarius.				
552	Arvenensis.				
553	Deltoides. This beautiful little gem with dark green fine foliage covers itself with many small crimson flowers. A fine spreader. 6-8 ins. June—July.	.90	2.40	18.00	
554	Deltoides albus. The white flowering form of the above.	.90	2.40	18.00	
555	Caesius. (Cheddar Pink). A very compact grower forming cushions of silvery-gray, which are covered with sweet smelling rose-colored flowers. A choice Rockplant. 6-8 ins. May—June.	.90	2.40	18.00	
560	Mosaicus.	P.G.			
563	Neglectus. An uncommon choice plant. A slow grower. Large red-purple flowers. 3-4 ins. June.	P.G.	1.50	3.00	25.00
564	Petraeus.				
565	Graniticus. Forms large glaucous cushions with crimson flowers. 6 ins. June.	P.G.	1.05	2.50	20.00
566	Sundermanii.				
DRABA, (3) Cruciferae		(Withlow Grass)			
	Important spring flowering plants for well drained, limey soil in a sunny place.				
585	Bertolinii. A rare introduction, producing large yellow flowers in abundance. 3 ins. May—June.	P.G.	1.80	5.00	00.00
*586	Bruniaefolia. A well known hardy species with golden yellow flowers. 3 ins. April—May.	1.05	2.40	00.00	

DRYAS, (3) Rosaceae	(Mountain Avens)	3	10	100
These dwarf evergreen plants are excellent for Rockgarden Planting. For an open rich sandy soil and sun. (Not dry.)				
595 Drumondii.				
*596 Octopetala. Forms neat carpets of deep green glossy foliage, turning bronze during the winter. The underside of the leaves are silvery-gray. White flowers like an anemone. Very choice and beautiful. 3-6 ins. June. P.G.		1.20	3.00	00.00

E

EPILOBIUM, Onagraceae

625 Hectori.	This creeping gem has small green round leaves which turns beautiful bronze in winter, giving the plants an appearance of hammered copper. Tiny white flowers cover the plants in June. Choice. $\frac{1}{2}$ inch. P.G.	1.20	3.00	25.00
ERICA, (8) Ericaceae	(Heather) We have introduced several new species of high merit. Ericas are most interesting plants which should be in every Rockgarden. They are lime haters and like a sandy, peaty soil and sunny locations. All Pot Grown.			

630 Carnea.				
631 Cinerea, hybrida.	Forming neat little evergreen shrubs which are covered with masses of rose pink flowers. 10 ins.	1.75	5.00	00.00
633 Tetralix, rubra.	A wonderful compact grower with tiny red bell shaped flowers, which cover the whole plant. 8-10 ins. Summer.	1.75	5.00	00.00
634 Cupressifolia.	A real gem, very dwarf and compact, spreading over rocks covering them with a dark green carpet. Rose pink flowers. 3-4 ins. Summer.	2.10	6.00	00.00

ERINUS, (2) Scrophulariaceae

Ordinary soil. A sunny spot in the Rockery or on dry walls.

645 Alpinus.	Delightful little plants forming rosettes, which are covered with pale rose-purple flowers. 4 ins. April—June.	1.05	2.40	18.00
---------------------	--	------	------	-------

ERYSIMUM, (3) Cruciferae

(Miniature Wallflower)

Prefer a hot sunny location in ordinary soil. Dry Wall Plants.

693 Pulchellum.	The Fairy Wall Flower. Dwarf plants with masses of sulphur yellow flowers. Choice. 6 ins. Summer.	.90	2.40	18.00
------------------------	---	-----	------	-------

EUPHORBIA, (1) Euphorbiaceae	(Milkwort)	3	10	100
Very interesting plants. Ornamental, of shrublike habit. Ordinary soil and sun or half shade.				
701 Polychroma. The most beautiful of the Genus, forming dense ball shaped shrubs with fine green foliage. Pale yellow flower heads. Choice. 12-18 ins. May—June.		.90	2.40	18.00

F

FESTUCA, Gramineae

710 Glauca. A fine dwarf silvery blue cushion forming grass. 6 ins.	.90	2.40	18.00
--	-----	------	-------

FUNKIA, (3) Liliaceae (Day Lily or Plaintain Lily)

Useful plants for border edging. Deep good soil in sun or part shade.

715 Coerulea. Fine foliage. Deep blue flowers on nodding stems. 6-8 ins. Summer.	.75	1.50	12.00
720 Variegata. Excellent variegated foliage.	.75	1.50	12.00

G

GENTIANA, (4) Gentianaceae (Gentian)

A wonderful plant group most desirable for rockgarden planting. They are extremely interesting and on account of their intense blue colors of the flowers, they are unsurpassed by any other plant. Gentians like a stony good soil and sun. They hate lime and draught.

740 Acaulis. (Gentianella).	P.G.
741 Lagodechiana.	P.G.
743 Verna.	P.G.

GERANIUM (3) Geraniaceae (Cranes Bill)

GLOBULARIA (3) Selaginellaceae (Globe Daisy)

GEUM, (4) Rosaceae (Avens)

GYPSOPHILLA, (4) Caryophyllaceae (Baby's Breath)

Good trailers. A good lime containing soil. Sun.

*775 Cerastoides. Pretty little plants with masses of white rose veined flowers. Choice. 1 inch. May—June	P.G.	1.20	3.50	30.00
776 Repens. A well known prostrate species with beautiful bluish foliage. Masses of tiny white flowers. 2 ins. May—June.		.90	2.40	18.00

H

HELIANTHEMUM, (8) Cistaceae	(Sun or Rock Rose)	3	10	100
These low growing evergreen plants have dark green foliage entirely covered with masses of flowers in most beautiful bright color shades. Good sandy soil on a dry very sunny bank or in the rockgarden makes them flourish. Only Pot Grown Plants.				
787 Firefly. Double, bright scarlet flowers.	1.05	2.70	24.00	
791 Rose Queen. Single, large pink flowers.	1.05	2.70	24.00	
797 Mutabile. Mixed in good colors.	.90	2.40	18.00	
HERNIARIA, Caryophyllaceae	(Rupture wort)			
Very small leaved trailing or sprawling plants. Excellent for carpeting and seashore plantings. Dry sandy soil. Sun.				
820 Glabra. Dense mats of mosslike foliage, turning deep bronze in winter. Good for covering bulb plantings.	.75	2.00	12.00	
HEUCHERA, (4) Saxifragaceae	(Coral Bells)			
Bushy plants with beautiful foliage. Rich soil in half shade.				
*832 Sanguinea, splendens. A beautiful variety with slender wiry stems of red color. Flowers rose-pink. 10 ins. June—August. P.G.	1.05	2.70	24.00	
HIERACIUM, (2) Compositae	(Hawk-weed)			
Excellent Rockplants for dry sunny places and stony soil.				
836 Lanatum. The whole plants have a felt like cover, giving them a silvery appearance. Pale yellow flowers. 6-8 ins. June. P.G.	1.20	3.50	00.00	
HORMINUM, (1) Labiateae				
HUTCHINSIA, Cruciferae				
Good plants for half shade and good stony soil.				
*855 Alpina. A beautiful alpine with glossy finger-like foliage. The flowers are produced in clusters. White. 3-4 ins. May—June. P.G.	1.20	3.50	00.00	
HYPERICUM, (2) Hypericaceae	(St. Johns wort)			
For a sunny place and ordinary, gritty soil.				
860 Coris. A new and fine introduction. Small heathlike sub-shrubs covered with golden yellow flowers. Choice. 6-8 ins. June—July. P.G.	1.50	4.00	00.00	
864 Reptans. A dwarf trailer from the Himalayas. Golden yellow flowers. 1 inch. Summer.	1.05	2.70	24.00	
Do not hesitate to write, when you want to know anything about Rockplants or Rockgarden Construction. We are experts.				

I

IBERIS, (3) Cruciferae	(Candy tuft)	3	10	100
Well known Garden Favorites. Indispensable for the Rockery or Border. Ordinary soil. Sun.				
870 Sempervirens. The old fashioned, with fine white flowers. 6-8 ins. May—June.		.90	2.00	15.00
Watch these new and beautiful introductions of which we have a limited stock ready in May.	P.G.			
*871 Jucunda. Very dwarf. Free flowering. Rose. 3 ins. Summer		2.10	5.00	00.00
*871 Prouti. Another dwarf gem. Pink. 2 ins.		3.00	5.50	00.00
*872 Saxatilis. The dwarfest white flowering. 4 ins.		2.10	5.00	00.00

INCARVILLEA, (2) Bignoniacceae

(Trumpet Flower)

Gems of the Garden, which should be more
appreciated. For a shady place and deep good
soil.

875 Grandifl. Delawayi. The striking beauty of
their large light crimson trumpets which are
produced in trusses, makes these floral Gems
most desirable. 9 ins. May—June. P.G.

.90 2.40 18.00

IRIS, (8) Iridaceae

890 Cristata. The tiny plants have pale blue
flowers. The dwarfest of the Irises. 3 ins.
We grow 4 different PUMILA SPECIES.

.90 2.40 18.00

L

LEONTOPODIUM, Compositae (Edelweiss)

Every year many of the tourists of the Alps
risk their lives to pick one flower of these
Alpine Gems. We grow it here in our Nursery
under our own special treatment, enabling us
to sell an Edelweiss true to nature and color.
Well drained soil, gritty and very rich on
lime, and a sunny place.

910 Alpinum. The Genuine. 3 ins. Small Pot
grown plants ready in May.

1.20 3.00 00.00

911 Rainbow Hybrids. Giant flowering (New).
\$1.00 each.

LINARIA, (1) Scrophulariaceae (Toad Flax)

Excellent plants for Rock work and Wall
Planting. Ordinary gritty soil. Sun.

926 Cymbalaria. A charming low growing trailer
with shining foliage and purple flowers. 3 ins.
All summer.

.90 2.40 18.00

927 Alpina.

LINUM, Linaceae	(Flax)	3	10	100
Plants with pinlike graceful foliage. Flowering all summer. Ordinary gravelly soil. Sun.				
931 Alpinum. A prostrate species with beautiful foliage and blue flowers. 8-10 ins.		1.05	2.70	24.00
932 Perenne. Very attractive. Pale blue flowers. 10-12 ins.		.90	2.40	18.00
LOTUS, (1) Leguminosae	(Wonder Plant)			
LYCHNIS, (3) Caryophyllaceae	(Campion)			
Free-flowering plants of easy culture. They are much admired on account of their striking, bright flowers. Ordinary soil and sun.				
960 Alpina. A neat little gem, forming cushions of needle-like foliage, with tiny rose pink flowers. Very choice. 6-8 ins. June—July. P.G.		1.20	3.00	25.00
961 Lagascae.				
963 Viscaria, splendens. The old-fashioned Cam- pion. When planted in masses, they make an effective show with their brilliant, fiery red flowers. 10 ins. Summer.		.75	2.00	15.00
M				
MICHELLA, Rubiaceae	(Partridge Berry)			
1010 Repens. An attractive trailer with small evergreen glossy leaves. The bright scarlet berries cover the plants in Winter. Plant under evergreen or shade trees as ground cover. Shade or half shade and leafy, sandy soil.		.75	2.00	15.00
MECONOPSIS, (4) Papaveraceae	(Thibet Poppies)			
Plants introduced from the Himalayas and high mountains of Central China. They like a moist, shady location, and a well-drained, gravelly soil. Pot-grown plants ready in May.				
*1025 Baileyii. This beautiful species has glaucous foliage and produces on slender, nodding stems light blue poppy-like flowers. Very choice and rare. 8-10 ins. Summer.		2.10	4.50	00.00
1025 Camprica, aurantiaca.				
1027 Himalayensis. Very hardy plants with beau- tiful cut glaucous foliage. Large golden yel- low flowers. 6-8 ins.		2.10	4.50	00.00
MERTENSIA, Boraginaceae	(Virginia Bells)			
For shady places and good soil.				
1035 Virginica. Plant in masses together with daffo- dils, this making an unforgetable picture. The many bell-shaped flowers are borne on graceful, nodding stems, and have a brilliant blue color, later fading to a clear pink. 12-18 ins. April—May.		.90	2.40	18.00

MYOSOTIS, (3) Boraginaceae	(Forget-me-not) For sun or half shady places. Ordinary soil.	3	10	100
1050 Alpestris, mana.	A dwarf form of the common Alpestris. The dark green leaves are covered with sky-blue flowers. 6 ins. May—June.	.90	2.40	18.00
1052 Palustris.	The well-known Forget-me-not for the waterside.	.75	1.50	12.00
1053 Rupicola.	A rare, new introduction from the Swiss Alps. The plants form neat rosettes with dark green hairy foliage. Flowers, of a beautiful deep ultramarine blue, on short stems. A gem of a plant which does not spread as the common Forget-me-not. 3 ins. May—June.	2.10	4.50	00.00
1054 Semperflorens.	The old-fashioned Garden Forget-me-not.	.75	1.50	12.00
1055 Welwitchii.	Did you ever see a silver-leaf Forget-me-not? Here it is, and it's a gem with beautiful porcelain-blue flowers. Very rare and choice. 4 in.	2.10	5.50	00.00

There are not all the varieties listed which we have on our trial and testing grounds. When you hear or read about a new plant (Rockplants or Alpines) write us, maybe we have it.

Rockplants are like our children; we know them and we love them.

O

OENOTHERA, (2) Onagraceae	(Evening Primrose)
	Charming plants for the Border or for the Rockgarden. Ordinary soil. Sun.

1080 Glabra.	
1083 Missouriensis.	A dwarf species with many large cup-shaped yellow flowers. 12 ins. Summer.

OMPHALODES, (1) Boraginaceae	(Navel wort)
	Beautiful new introduction of rapid trailing habit. Good for Woodland planting in good soil and half shade.

*1090 Verna.	This fast growing plant covers the ground with egg-shaped leaves which are hidden by masses of Forget-me-not like brilliant blue flowers. 6 ins. April—May.	.90	2.40	18.00
---------------------	---	-----	------	-------

*1091 Cappadocica.	This plant forms compact tufts, which are covered with masses of charming blue flowers. 3-4 ins. May.	1.20	3.00	25.00
---------------------------	---	------	------	-------

OROBUS, (1) Leguminosae.	(Bitter Vetch)
	Excellent ground covers for shady locations and good sandy soil.

1105 Vernus.	Dark green foliage and brilliant red flowers on long trailing shoots. 10 ins. May—June.	1.05	2.70	00.00
---------------------	---	------	------	-------

P

PAPAVER, (3) Papaveraceae	(Poppy)	3	10	100
Plant poppies in early Spring or Fall only.				
We ship Pot grown plants only. The beautiful forms and colors are well known. A deep loamy soil and a sunny location suits them.				
1125 ALPINUM. Mixed in colors of pink, orange, red and yellow. 8-10 ins. Summer.		1.20	3.00	25.00
PENTSTEMON, (2) Scrophulariaceae	(Beard Tongue)			
Most interesting and very charming plants for a sunny place and ordinary soil.				
*1176 Pygmaeus. The dwarfest of the Pentstemons, forming neat tufts with dark green foliage. The numerous flowers are purple with yellowish-white on the inside. 6 ins. July—Aug. P.G.		1.50	4.50	00.00
1177 Pumila.				
1178 Watsoni.				
PHLOX, (3) Polemoniaceae.				
Unsurpassed plants as ground cover. For dry sunny banks and any soil. Good for Wall planting and Border edging.				
1185 Canadensis (Divaricata). This beautiful species is excellent for the Rockery or Border. Some good-sized clumps planted in a corner make a good effect. The many charming star-like flowers are large and fragrant. Flowers: Mauve, lavender. 6-8 ins. April—May.		.90	2.40	18.00
1187 Amoena. A beautiful brilliant flowering carpet which forms close mats with sheets of rosy pink. For terrace or wall planting. 4 ins. March—April.		.90	2.00	15.00
1188 Subulata, rosea. (Moss Pink.) These well-known plants are used for planting on dry, hot, sandy banks or walls. Carpets of rose-pink flowers. Poor soil. 3-4 ins. Early Spring.		.75	1.50	12.00
1189 Subulata, alba. The pure white flowering form of the above.		.75	1.50	12.00
1190 Setacea, "Vivid." This beautiful, charming variety is undoubtedly the finest free-flowering of the dwarf Phloxes. They are slow growers with sheets of bright pink flowers with a fiery red eye. 3-6 ins. Spring.		1.05	2.70	24.00

PLATYCODON , Campanulaceae	(Balloon Flower)	3	10	100
Charming and interesting plants for deep, well-drained soil. Sun or half shade.				
1205 Mariesi. The dwarfest of the Genus, with broad, thick leaves and large cup-shaped deep violet-blue flowers. 10-12 ins. July—Sept.		.90	2.40	18.00
POLEMONIUM , (1) Polemoniaceae (Jacob's Ladder)				
For a sunny or half shady place in the Rockery or Border. The flowers are good for cutting. Ordinary soil.				
When you make out your order, don't forget Polemoniums.				
1215 Coeruleum. The beautiful fern-like foliage alone makes the plants valuable. The bushy plants produce on erect stems numerous sky-blue flowers. Choice. 12 ins. June—July.		.90	2.40	18.00
1216 Richardsoni (True). This is the finest species of the Genus. Out of the beautiful bushy plants shoot slender spikes with clear blue flowers. Cut back after first bloom; then they will flower again in August—Sept. 9 ins. June—July.		1.20	3.50	00.00
1217 Reptans (Greek Valerian). A compact, early flowering kind with panicle-like clusters of light blue flowers. 8-10 ins. April—June.		.90	2.40	18.00
POTENTILLA , (4) Rosaceae. (Cinquefoil)				
This group of charming, bright flowering plants is not yet sufficiently appreciated and planted in American Gardens. A sunny location and heavy soil they love.				
1225 Alpestris (New). The beautiful finger-like foliage forms close mats. The large flowers are golden yellow. 6 ins. June—Sept. P.G.		1.50	4.00	00.00
1228 Chrysocraspeda. A new and uncommon species. The beautiful dwarf cushions with striking foliage are covered with bright yellow dark-centered flowers. 6-8 ins. June—July. P.G.		1.80	5.50	00.00
1232 Tridentata. A beautiful evergreen gem for planting on dry banks. White flowers. 6 ins. June—July. P.G.		1.20	3.50	00.00
1233 Appenina, aurea. (New.) P.G.		0.00	0.00	00.00

PRIMULA, (42) Primulaceae	(Primrose)	3	10	100
We have under cultivation many old and new varieties. About 30 different choice and rare species are ready in Fall. The plants like ordinary soil, a sunny or half shady place.				
1245 Elatior. Pale yellow. 6 ins. April—May.	.90	2.40	18.00	
1285 Veris. Bright golden yellow. 6 ins. April—May.	.90	2.40	18.00	
PORTULACA, Portulacaceae.	(Purslane)			
Of these Annuals we have only Seeds, which are clean and gathered from the finest strain. When the seeds are sown in the open ground during April or May, strong flowering plants will be obtained 6 weeks later. The beauty of their flowers is not to describe. On very dry, hot and sandy banks or along steps in the Rockery they do well. Masses of flowers of brilliant colors from Spring until frost. 6-8 ins. A large portion of seeds 25 cents				
PULMONARIA, (1) Boraginaceae	(Lungwort)			
Plants of easy culture. They resemble Mertensias, but have beautiful silver-spotted, dark green foliage. Half shade and open, light soil.				
*1310 Angustifolia, Azurea. Very choice and uncommon. Sky-blue flowers on slender, graceful stems. 8-10 ins. April—May. P.G.	1.50	4.00	00.00	
PYRETHRUM, (2) Compositae	(Turfing Daisy)			
1320 Tchihatchewii. This beautiful new introduction is a low-growing Sub-Alpine, from Asia Minor. The elegant cut foliage is silvery-white and entirely wooly. Ordinary soil and sun. 6 ins. Summer.	1.20	3.50	00.00	
R				
RAMONDIA, (1) Gesnericeae.				
S				
SAPONARIA, (2) Caryophyllaceae	(Soapwort)			
Good spreaders for sun and ordinary sandy soil.				
1360 Alba. Carpeters with numerous white flowers. 6 ins. May.	.90	2.40	18.00	
1361 Ocymoides. Bright pink. 6 ins. June.	1.05	2.70	24.00	
1362 Ocymoides, Splendens. Beautiful rose-pink. 6 ins. June.	1.20	3.00	25.00	

SAXIFRAGA, (28) Saxifragaceae.	(Rockfoil)	3	10	100
Saxifragas are well known in European gardens. They are grown on account of their strange beauty and forms. In general the plants like a lime-containing, coarse, gravelly soil, and sun.				
Many new and extremely scarce varieties are under cultivation in our Nursery.				
1380 Crassifolia. (Megasea Group.) Large, shiny, clustered leaves from which rise masses of pink, drooping flowers on nodding stems.				
10 ins. April—June.	1.05	2.70	20.00	
1381 Decipiens. A splendid plant for the Rockery or for Border edging. The dwarf, mossy plants form dense cushions covered with masses of white flowers on slender, wiry stems. 4-6 ins. May—June.				
1390 Hypnoides. Another fine mossy carpeter. Similar to Decipiens with pure white flowers. 6 ins. May—June.	.90	2.40	18.00	
1400 Leucanthemifolia. A scarce Alpine variety for leafy soil and a half shady, moist location. Fine serrated foliage. Many star-like flowers. White. 8 ins. June.	1.05	2.70	24.00	
1.50	3.50	00.00		
SHORTIA, Diapensiaceae.				
1450 Galacifolia. A charming, galax-like plant for shady places and leafy soil. The dark green, glossy foliage is evergreen. Small white flowers. 6 ins. June.	.90	2.40	18.00	
SCHIEVERECKIA, Cruciferae.				
1455 Bornmuelleri. A charming floral gem. It forms neat little silvery-gray rosettes, which are covered with Arabis-like flowers. White. Sun and ordinary soil. 3 ins. April. P.G.	1.50	4.50	00.00	
SEDUM, (21) Crassulaceae.	(Stone Crop)			
Sedums are very useful for the Rockgarden or Edging. They are of easiest culture and like sun and ordinary sandy or stony soils. Also good for Wall planting.				
All Sedums are sold: 90 cents for 3; \$2.00 per 10; \$15.00 per 100; except where otherwise noted.				
1480 Acre. A rapid grower, excellent for carpeting. The beautiful green mats are hidden by numerous yellow flowers. 2-3 ins. May—June.				
1485 Aizoon. Dark green foliage with yellow flower heads. 10 ins. July—August.				
1488 Album. Forms neat, dark green mats with masses of white flower heads on little stems.				

	Very choice for planting in walks. 3-4 ins. June.	3	10	100
	Anglicum. (See <i>Hispanicum</i> .)			
1498	Dasyphyllum. An interesting low species; the dwarfest of the Family. Forms neat cushions of bluish gray. The little rosettes have pink tips. $\frac{1}{2}$ -inch.	1.20	3.50	00.00
1505	Ewersi. A trailing variety with fine glaucous foliage. Pink flowers in globose cymes. Very good. 6 ins. July.	1.05	2.70	20.00
1506	Forsterianum. A beautiful species forming compact tufts, with shoots of a distinct blue color. Each shoot forms a terminal rosette. Good for Wall planting.	.90	2.40	18.00
1510	Hispanicum. (Anglicum or <i>Glaucum</i> .) A fine plant for Rockwork or for Border edging. The plants form close mats of a bluish color, covered with whitish flowers. 2 ins. May—June.			
1512	Kamtschaticum. A somewhat taller-growing kind with dark green foliage. Yellow flowers. 6 ins. Summer.			
1515	Kamtschaticum. fol. var. The variegated foliage has shades of green, ivory and pink. 6 ins.	1.05	2.70	24.00
P.G.				
1520	Lydium. This handsome variety forms dense, deep green mats which turn red in Winter. Fine for Border edging. 3 ins.			
1530	Pilosum. A rare and choice species, forming light green, hairy rosettes which lie close to the ground. Pink flowers. 2 ins. June.	1.50	3.50	00.00
1540	Roseum. Pretty and handsome, with thick, fleshy, emerald-green foliage, shaded beautiful bronze. Golden yellow flowers. 4 ins. July.	P.G.		
1545	Sarmentosum. Rapid spreaders; useful for covering dry, hot, sandy banks with very poor soil. Also grows good in half shade. 2 ins. Special Prices on large Quantities.	1.05	2.70	24.00
1550	Sexangulare. Another dwarf kind. The dark green leaves and the yellow flowers are very showy. 2 ins. June.	Special Prices on large Quantities.		
1555	Sieboldi. A Japanese species. It has the odd form that is remarkable on all Japanese plants. The fine glaucous foliage is whorly. Rose-pink flower heads. 6 ins. August. P.G.			
1560	Stoloniferum. Similar to Sieboldi, but grows somewhat slender.	1.20	3.00	00.00
1561	Spathulifolium. Many neat rosettes of ashes-gray color. Choice. 6 ins.	P.G.		

1562	Spurium, Coccineum. This handsome green-leaved variety is most desirable for ground and grave covering. It spreads rapidly. The foliage turns blood-red in winter. Also good for Shade. Rose-red flowers. 6 ins. June—July.	3	10	100
1565	Ternatum. Similar to Spurium, but has light green foliage that stays green in Winter. P.G. All Field grown Sedums are extra strong plants.			
SEMPERVIVUM, (18) Crassulaceae (House Leek)				
	These plants grow under the same conditions as Sedums. They form fleshy, odd-shaped rosettes which are covered with spiderweb-like hairs. Some varieties have color shades of light green, metallic bronze or steel blue. Excellent dry Wall Plants.			
1570	Best varieties, mixed.	.90	2.40	18.00
SILENE, Caryophyllaceae. (Catch Fly)				
	This charming plant group resembles very much the Moss Pinks; but instead in Spring, they have a profusion of flowers during Summer. Ordinary soil. Sun, or half shade.			
1600	Alpestris. A dainty, pure white flowering species. 6 ins. May—June.	.90	2.40	18.00
1602	Asterias, Grandifl. A new introduction of value. Excellent for the Border. The bright green plants are crowned with beautiful globose flower heads of crimson-scarlet color. 18-20 ins. July—Sept.	1.20	3.50	00.00
1604	Shafta. (Autumn Catch Fly.) Masses of bright pink flowers. 4-6 ins. July—Oct.	.90	2.40	18.00

SOLDANELLA, (1) Primulaceae.

Watch in the Fall when we offer this beautiful Alpine Gem.

T

THYMUS, (4) Labiateae.	(Thyme)
These aromatic plants are well known. They are of a shrubby habit and spread fast over the ground. They are valued as ground covers and Flagging Stone Walk planting. For a sunny location and ordinary soil.	
1725	Carnosus.
1728	Lanuginosus. The daintiest of the Genus; covers the ground with wooly mats of silvery-gray color. Very choice. 1-2 ins. P.G.
	.90 2.40 18.00

1729	Serpillum. The variety with small evergreen foliage. 1 inch.	3 .90	10 2.40	100 18.00
1735	Vulgaris. The common large-leaved variety. A fast grower. Also for half shade. 3-4 ins.	.75	2.00	15.00

TUNICA, Caryophyllaceae.

1765	Saxifraga. This handsome tufty species was greatly admired last year. We were sold out within two weeks. It is of a spreading habit and produces many tiny rose-pink flowers on slender, wiry stems. It is of greatest value as it blooms continuously from Spring until late Fall. Sun and ordinary soil. 6-10 ins.	.90	2.20	16.00
-------------	---	-----	------	-------

V

VERONICA, (8) Scrophulariaceae (Speedwell)

All Veronicas are valuable for Rockgarden or Border. The dwarf kinds are good spreaders. For good, well-drained soil and a sunny place.

1805	Erica. A charming kind. The bushy plants bear masses of heather-like rosy flowers. 10 ins. July—August.	.90	2.40	18.00
1806	Candida. A new white-leaved variety. P.G.	1.50	4.50	00.00
1807	Chamaedrys.			
1808	Prostrata. A low, creeping species forming close mats, which are entirely covered with true blue flowers. 4-6 ins. June—July.	1.05	2.70	24.00
1809	Repens. Excellent for ground cover or Stepping-stone Plantings. Close, dark green mats. Light blue cup-shaped flowers close to the plant. 1 inch. May.	.90	1.50	12.00
1810	Rupestris. The finest of the creeping, with dark green foliage, entirely hidden by charming deep blue flowers. 4-6 ins. June.	.90	1.80	15.00
1811	Rupestris, rosea. Uncommon. The pink flowering form of the above. P.G.	1.20	3.00	25.00
*1815	Rupestris, Nana. A creeping species with shiny, leathery foliage. Blue flowers. 6 ins. July.	.90	2.40	18.00
1816	Royal Blue. Improvement of the old-fashioned Subsessilis, as it grows more compact. Spikes of lustrous blue flowers. 10-12 ins. June—July.	.90	2.40	18.00
	Spicata. Another good improvement with pink, light blue and deep blue flowers. 10-12 ins. July.	.90	2.40	18.00
		.90	2.40	18.00

VIOLA, (16) Violaceae (Tufted Pansies—Violets)	3	10	100
Their merits and beauty need no mentioning. Pot-grown plants of the following varieties ready the latter part of May. Tufted Pansies should be cut back several times during the season to insure continuous flowering.
